Brilliant Supports Public Health and Safety

Listserv provided to LSRPs by Site Remediation Program:

In light of the dangers posed by COVID-19 and to mitigate community spread of the disease, New Jersey Governor Phil Murphy issued Executive Order 107 on March 20, 2020 (EO 107; <https://nj.gov/infobank/eo/056murphy/pdf/EO-107.pdf>), requiring all business and non-profits to accommodate their workforce to work-from-home wherever practicable, and to make best efforts to reduce staff on site to the minimal number necessary to ensure that essential operations can continue.

NJDEP received inquiries from regulated entities and stakeholders questioning whether their operations are restricted by EO 107 and whether their organizations should be designated as essential. Every organization operating in New Jersey should review EO 107 and other COVID-19 executive orders (https://nj.gov/infobank/eo/056murphy/approved/eo_archive.html) carefully. EO 107 specifically restricts the physical (brick-and-mortar) operations of non-essential retail, recreation, entertainment and dining businesses. Under EO 107, other businesses and non-profit organizations, whether closed or open to the public, may continue operating at this time consistent with the requirements of EO 107 for ensuring social distancing, reducing on-site staff to the minimum persons necessary, and accommodating as much remote work as practicable.

NJDEP acknowledges that many regulated entities and environmental service providers perform critical functions that support public health and safety, and that some of their functions cannot be achieved remotely. Sectors that have made inquiry of DEP seeking clarity on the applicability of EO 107 include:

- Public works and infrastructure, including energy-generating facilities
- Drinking water, wastewater, and distribution/conveyance systems
- Managers of solid waste, regulated medical waste, hazardous waste, and recyclables
- Providers of environmental services, including licensed professionals (e.g., LSRPs), subcontractors and staff persons whose primary functions are to conduct, monitor, maintain, or support activities for the protection of public health, safety and the environment, including the provision of supplies necessary for these protective purposes
- Laboratories
- Pesticide applicators
- Recreational and commercial fisherman

Insofar as businesses and non-profits not specifically restricted by EO 107 may continue operations, including regulated entities and environmental service providers who perform critical functions that support public health and safety, no formal designation as essential of any of the sectors or organizations that have contacted NJDEP is necessary or expected at this time. However, all

organizations are directed by EO 107 to practice social distancing by reducing on-site staff and accommodating remote work to the maximum extent practicable. The number of on-site staff necessary to ensure an organization's essential operations is a matter of professional judgment on the part of every organization. NJDEP acknowledges that essential on-site staffing determinations will differ by sector and operational circumstances. In adapting operations during this time, every organization must consider arrangements that further the social distancing requirements and objectives of EO 107 to the greatest extent practicable.

OSHA Ten Steps All Workplaces Can Take to Reduce Risk of Exposure to Coronavirus

All workplaces can take the following infection prevention measures to protect workers now and far into the future:

1. Encourage workers to stay home if sick.
 2. Encourage respiratory etiquette, including covering coughs and sneezes.
 3. Provide a place to wash hands or alcohol-based hand rubs containing at least 60% alcohol.
 4. Limit worksite access to only essential workers, if possible.
 5. Establish flexible worksites (e.g., telecommuting) and flexible work hours (e.g., staggered shifts), if feasible.
 6. Discourage workers from using other workers' phones, desks, or other work tools and equipment.
 7. Regularly clean and disinfect surfaces, equipment, and other elements of the work environment.
 8. Use USEPA approved cleaning chemicals with label claims against coronavirus.
 9. Follow the manufacturer's instructions for use of all cleaning and disinfection products.
 10. Encourage workers to report any safety and health concerns.

Remediation Standards

Notice of extension of comment period and postponement of public hearing on proposal [Proposal of New Rules, Amendments, and Repeals, N.J.A.C. 7:26D](#).

Take notice that the NJDEP is extending the comment period for the proposed new rules, amendments, and repeals at N.J.A.C. 7:26D, Remediation Standards, and postponing the public hearing. The remediation standards apply to contaminated sites throughout the State.

The proposal was published in the New Jersey Register on April 6, 2020, at 52 N.J.R. 566(a). The comment period for the proposal was originally scheduled to close on June 5, 2020. The Department is extending the comment period for 60 days, until August 5, 2020. The Department is also postponing the public hearing on the proposal, which was originally scheduled for May 11, 2020. The Department anticipates holding a public hearing on the proposal. The date and time of the hearing will depend on circumstances surrounding the COVID-19 public health emergency. If the Department holds a hearing, the public comment period will be extended, if necessary, until after the hearing.

Further information on a public hearing, if one is held, will be posted on the Department's website at www.nj.gov/dep/rules/notices.html at least 15 days prior to the date of the hearing.

BRILLIANT CAN ASSIST YOU!

Brilliant is your advocate in identifying all of the options available to you...not just what's on the surface; affording you high-quality, personalized service without the high cost. We remain available and mobile to address any size project and prepared to meet with you to discuss your environmental needs. We are making improving our company daily to better service you today and into the future. Call us today at (732) 818-3380 or [email us](#).
