***Brilliant* COVID-19 Update**

As much as COVID-19 has been a huge challenge for the world and a challenge to *Brilliant*, recovering from bankruptcy during a pandemic has been nothing short of a miracle. With an excellent staff, loyal clients and a group of vendors willing to stand by *Brilliant*, we are surviving. There is no time to celebrate, especially with the condition of America, but *Brilliant* is happy to not only maintain our business, but continue to grow and work hard to satisfy all of our client's needs.

We are happy to report since the implementation of our COVID-19 policy on March, 16th, no *Brilliant* staff member or household family member has tested positive for COVID-19. *Brilliant* continues to monitor daily office tracing, working remotely when necessary and maintaining social distancing when in the office and field. *Brilliant* has transitioned all client meetings and pre-project meetings to the virtual world of Zoom and will continue to strive to provide all staff and subcontractors a safe work environment.

If you have any questions about *Brilliant's* policies and procedures, please do not hesitate to reach out to Phil Brilliant.

NJDEP Finally Adds Case Inventory Documents to DataMiner

The New Jersey Department of Environmental Protection (NJDEP) has created and posted a new DataMiner Report called Case Inventory Document

and Associated Areas of Concerns. This report summarizes the Areas of Concern (AOC) uploaded to a case and makes the Case Inventory Document (CID) available as a downloadable document. This report also provides a list of Registered USTs associated with the CID. The CID provides key information about a site and this report will provide that information in a timely fashion without the need for the Office of Record Access.

Whether during due diligence or investigating a potential offsite source, the ability to know review a CID real time will provide LSRPs with vital information. Not to mention, a LSRP should review the database before issuing a Response Action Outcome (RAO) to be assured all Areas of Concern match the NJDEP records. This report is now available in DataMiner under the Site Remediation, Case Tracking Category. <https://www13.state.nj.us/DataMiner/>.

Before leaving *Brilliant* and heading to Denver to pursue her sustainable development career path, Sara Brilliant standing with her last tank.

Brilliant Provides Assistance and Services to Businesses and Individuals with Compliance Issues

NJDEP recently issued a reminder to [Post-No Further Action Cases](#) requiring a Remedial Action Permit prior to **May 7, 2012**, stating that enforcement is coming soon. Those sites issued a No Further Action (NFA) letter with a NJDEP issued Limited Restriction or Restricted Use prior to May 7, 2012 is obligated to apply for and receive the required soil or groundwater Remedial Action Permit (RAP). *Brilliant* has been working with such companies to assist them with compliance, however NJDEP is not only reminding such persons, but stating they will be increasing their enforcement inspections and notices over the coming months.

If you need to obtain a Remedial Action Permit, have a permit and must comply with protectiveness certification requirements or have no idea; contact [*Brilliant*](#)

today!
